

TSR Solutions, a leading Wisconsin-based provider of technology and communication solutions, now offers an established, state-of-the-art enterprise class co-location Data Center located at 324 E. Wisconsin Ave, Milwaukee, WI. As the only carrier-neutral data center in Wisconsin, TSR i-**Site** Data Center provides carrier and pricing advantages to businesses interested in the Data Center's services. With over 5,200 square feet of available space and cross connects from AT&T, Norlight, US Signal, Savvis, MCI, Cogent and others, the TSR i-**Site** Data Center provides Co-location, Hosting, Disaster Recovery, Backup and Managed Services solutions in a highly redundant, secured environment.

Carrier Neutral Advantage

- Do you have a one-sided relationship at your current data center for your servers, voice, data, and disaster recovery planning? Would you rather shop around and work with a carrier you choose for the solution that best fits you instead of having limited choices? TSR's i-**Site** Data Center is carrier-neutral. You make the choice on which carrier and we work with you to do the rest.

Complete Build-Out

- Our center is fully equipped, state-of-the-art class leading facility. TSR's i-**Site** Data Center provides a turn-key flexible home for your servers, routers, firewalls and related equipment. From Small Business to Enterprise, we have the infrastructure solutions that can grow with you to keep you on line 7x24x365.

Staffed by Experienced Engineers

- When you have a question, wish to tour the facility or need to speak with someone regarding the i-**Site** Data Center, you will be speaking with TSR's qualified engineers who are on the premise.

Flexibility

- If you need to relocate just one server, a partial rack, 5 racks, or enough equipment to fill a 20'x20' secure cage, we have everything you need at our facility. Flexibility that meets your needs is our goal.

Comprehensive Managed Services

- At TSR's i-**Site** Data center you have access to proactive, comprehensive Monitoring Services to help you avoid any downtime by alerting you to problems BEFORE they have a negative impact on your business.
